

COVID-19 RESPONSE TEAM

Objective

We have created a multidisciplinary Incident Command Team designed to combat and react to this Pandemic. This team meets on a daily basis to discuss a variety of topics. Some of the many items the agenda are: Staff and Resident COVID-19 status indicators, facility supplies of PPE, staffing constraints, crisis mitigation and responses, review of the latest updates for CMS, CDC, MDHHS, and ICHD regulatory bodies, staff/family/resident concerns and responses, and current planning as well as future planning.

A representative of the team hosts daily meetings for all facility staff to attend notifying them of the latest guidelines and changes. This also provides a platform for staff questions and concerns which help promote further communication during this pandemic. We also replicate much of this information to our newsletter emailed to staff/family/residents who are unable to attend daily meetings due to restrictions or scheduling conflicts.
