

COVID-19 RESPONSE TEAM

Objective

We have created a multidisciplinary Incident Command Team designed to combat and respond to all the changes affecting our residents and staff as a result of the Pandemic. This team communicates frequently on a variety of topics including: Staff and Resident COVID-19 status indicators, facility supplies of PPE, staffing constraints, crisis mitigation and responses, the latest updates and recommendations from CMS, CDC, MDHHS, and ICHD regulatory bodies; staff/family/resident concerns and responses.

A representative of the team communicates to all residents, patients, and facility staff, notifying them of the latest guidelines and changes. Our Director of Communications sends out email newsletter updates to families, community members, and staff. To sign up for the newsletter, please return to our homepage.
